

SEVERE ROSACEA STUDY

Do you have severe rosacea?
Did you know many people who have
severe rosacea **actually** think they
have severe acne?

If you know you have severe rosacea or are currently experiencing what you **think** is severe acne, you may actually have severe rosacea and may qualify for a research study.

To qualify you must:

- be an adult
- currently have severe rosacea - a persistent red face with spider-like veins
- **and** have 30 or more acne-like bumps on your face.

Qualified participants will receive investigational study medication at no cost and may receive compensation for your time.
