

Do you have **Rough, Brown** bumps on your skin?

*If so, you may qualify to take part in a clinical research study conducted by a Board Certified Dermatologist to evaluate an investigational medication for **Seborrheic Keratoses**. A seborrheic keratosis is a common non-cancerous growth that may appear as a rough, tan or brown bump on the skin and often occurs in middle-aged and older adults.*

To participate, you must:

- Be at least 18 years of age
- Have at least 4 seborrheic keratoses
- Be generally healthy

Participants may be compensated up to \$550 for time and travel
